SYSTEM OVERVIEW & CONCEPT GUIDE

JULY 2026 — CONFIDENTIAL

SALVAGE VEHICLE AUCTION PLATFORM

GREEN & WHITE THEME

WHAT IS PRS?

PLATFORM NAME PRS — Salvage Vehicle Auction Platform	PLATFORM PURPOSE Online marketplace connecting insurance companies, salvage dealers, and private sellers
TARGET USERS Insurance Companies, Salvage Dealers, Private Sellers, Platform Administrator	GEOGRAPHIC REACH International — Open to users from anywhere in the world
DESIGN THEME Professional green and white color scheme	PLATFORM MODEL B2B & B2C auction marketplace with transparent bidding

USER TYPES 4 Insurance Companies, Salvage Dealers, Private Sellers, and Administrator — each with unique registration and dashboard	CORE FUNCTION Auction Insurance companies list salvage vehicles; dealers bid to purchase; sellers manage offers — all in one platform	KEY DIFFERENTIATOR Folders Each insurance company has its own folder — dealers browse by company, building trusted business relationships
---	---	---

PRS is an online platform designed specifically for the salvage vehicle industry. It brings together insurance companies who need to sell damaged vehicles, salvage dealers who want to buy them, and private sellers who have accident cars they want to sell. Think of it as a dedicated online auction house — built from the ground up for how this industry actually works.

Unlike general auction websites, PRS understands the unique relationships between insurance companies and salvage dealers. It provides tools that make it easy for companies to manage their vehicle inventory, for dealers to find the vehicles they need, and for everyone to conduct business transparently and efficiently.

Why PRS Exists: Insurance companies regularly need to sell vehicles declared as "total loss" after accidents. Currently, this process is fragmented and inefficient. PRS creates a single, organized marketplace where these transactions happen smoothly, saving time and increasing recovery value for all parties.

IN SIMPLE TERMS

"PRS is like an online shop, but instead of buying clothes or electronics, you're buying and selling damaged vehicles. Insurance companies post their accident cars, dealers browse and bid on them, and the highest bidder wins. Everyone knows who they're dealing with, and everything is organized in one place."

WHO USES PRS?

PRS serves four types of users, each with their own unique needs and capabilities on the platform.

1. Insurance Companies — The Sellers

When insurance companies declare vehicles as "total loss" after accidents, they need to sell those vehicles to recover some value. PRS gives them a professional, organized space to list these vehicles and receive competitive bids from registered dealers.

WHAT THEY DO	HOW IT WORKS
Register Their Company	Sign up with company name, phone, email, tax number (NTN), location, and create a secure password
Upload Vehicles	Add salvage vehicles with photos, make, model, variant, registration number, and comments about condition
Choose When to Sell	Option to publish immediately for bidding OR save as draft to collect multiple vehicles for a larger auction
Review Bids	See who is bidding and how much — full visibility into bidder names and amounts
Manage Dealers	Block dealers who win but don't pay; unblock when fine is paid
Organize in Folders	All their vehicles are organized in their own company folder for easy management

2. Salvage Dealers / Buyers — The Bidders

These are businesses or individuals who purchase salvage vehicles — either to repair and resell, or to sell for parts. PRS connects them directly with insurance companies offering salvage vehicles.

WHAT THEY DO	HOW IT WORKS
Register as Dealer	Sign up with company name or personal name, tax/ID number, phone, email, and password
Browse Company Folders	See all registered insurance companies in a side menu; open any company folder to view their vehicles
Place Bids	Bid on vehicles they want; see current highest bid amount (but not other bidders' identities)
Win & Pay	Receive notification when they win; arrange payment directly with the insurance company within agreed timeframe
Build Relationships	Work with specific insurance companies they prefer through the folder system

3. Private Sellers — Individual Vehicle Owners

Not just insurance companies — any individual who has an accident-damaged vehicle can register as a private seller and list their car for auction on PRS.

WHAT THEY DO	HOW IT WORKS
Register	Sign up with personal details, contact information, email, and password
List Vehicle	Upload accident vehicle with photos and details
Receive Bids	Get offers from registered salvage dealers
Accept or Reject	Choose whether to accept the best offer

4. Platform Administrator — The Manager

The admin oversees the entire platform, ensuring smooth operations, managing users, and handling any issues that arise.

- **User Management:** View, approve, suspend, or manage all registered users
- **Content Oversight:** Monitor vehicle listings and bidding activity
- **Dispute Handling:** Manage blocking/unblocking requests and resolve issues
- **Platform Health:** Oversee operations and ensure compliance with platform rules

HOW PRS WORKS — STEP BY STEP

Understanding the journey each user takes on the platform, from registration to successful transaction.

Insurance Company Journey

STEP 1: REGISTER & GET APPROVED

Insurance company visits PRS website, clicks "Sign Up," and fills in their details: company name, phone number, email, tax number (NTN), location, and password. They accept the platform policy and submit their registration for approval.

STEP 2: ACCESS COMPANY DASHBOARD

After logging in, the insurance company sees their personalized dashboard. On the side menu, they find their company folder where they can manage all their vehicle listings.

STEP 3: UPLOAD SALVAGE VEHICLES

Company uploads vehicles with multiple photos, vehicle details (make, model, variant, registration number), optional company valuation, and comments describing the vehicle's condition. They choose to either publish immediately or save as draft for later.

STEP 4: RECEIVE & REVIEW BIDS

Registered dealers start placing bids on published vehicles. The insurance company can see each bidder's name/company and their bid amount. They monitor bidding activity in real-time.

STEP 5: COMPLETE THE SALE

When the auction ends, the highest bidder wins. The insurance company receives notification with the winner's details. They arrange payment directly with the buyer (outside the platform) within the agreed timeframe. Both parties pay their platform fee to PRS.

Salvage Dealer Journey

STEP 1: REGISTER & GET APPROVED

Dealer visits PRS, clicks "Sign Up," and fills in their details: company/personal name, tax/ID number, phone (optional), email, and password. They accept the platform policy and submit registration.

STEP 2: BROWSE INSURANCE COMPANY FOLDERS

After logging in, the dealer sees all registered insurance company folders on the side menu. They can open any folder to see vehicles listed by that specific company. This helps them work with companies they already have relationships with.

STEP 3: VIEW & BID ON VEHICLES

Dealer opens a vehicle listing, views photos and details, and places their bid. They can see the current highest bid amount but cannot see who else is bidding or what others have bid. This keeps the process fair and competitive.

STEP 4: WIN & COMPLETE PURCHASE

If they're the highest bidder when the auction ends, they receive a notification with vehicle details and insurance company contact information. They arrange payment directly with the insurance company and pay their platform fee to PRS.

KEY FEATURES EXPLAINED

PRS includes several innovative features designed specifically for the salvage vehicle industry.

Company Folders — Organized Business Relationships

Each insurance company gets their own dedicated folder on the platform. When dealers log in, they see all registered insurance company folders displayed on the side of their screen.

EXAMPLE FOLDER VIEW	WHAT DEALER SEES
Adamjee Insurance Folder	All vehicles currently listed by Adamjee Insurance — available to browse and bid
EFU Insurance Folder	All vehicles currently listed by EFU Insurance — organized and easy to access
Jubilee Insurance Folder	All vehicles currently listed by Jubilee Insurance — building ongoing business relationship
[Any Insurance Company]	Each company gets their own space — dealers know exactly who they're working with

WHY THIS MATTERS

"Instead of searching through hundreds of mixed listings, dealers can go directly to the insurance companies they prefer to work with. It's like having a separate showroom for each insurance company — organized, professional, and easy to navigate."

Draft & Publish — Flexible Auction Timing

Insurance companies don't have to publish vehicles immediately. They have two choices for managing their inventory:

OPTION A: PUBLISH NOW

- When the insurance company wants to start receiving bids immediately, they publish the vehicle right away. It appears in their folder and dealers can start bidding instantly.

OPTION B: SAVE AS DRAFT

- When the insurance company wants to collect multiple vehicles first, they save them as drafts.
- Later, they can publish all vehicles together for a larger, more attractive auction event. This
- strategy can attract more bidders and potentially higher bids.

Bidding System — Transparent but Fair

The bidding process is designed to give sellers full information while maintaining competitive fairness among bidders.

WHAT INSURANCE COMPANIES SEE	WHAT DEALERS SEE
Bidder's name or company name	Current highest bid amount only
Bid amount for each bidder	Their own bid status
Complete bid history	Vehicle details and photos
Number of bidders interested	Insurance company name they're bidding with

Why This Design? Dealers cannot see who else is bidding or what others have bid — only the insurance company has full visibility. This prevents bid manipulation, encourages genuine competitive bidding, and protects dealers' business strategies from competitors.

MORE KEY FEATURES

Blocking System — Protecting Insurance Companies

Sometimes a dealer wins a bid but fails to pay. To protect insurance companies from repeated non-payment issues, PRS includes a blocking mechanism:

THE BLOCKING PROCESS

- 1. Non-Payment Occurs:** Dealer wins a bid but doesn't pay within the agreed timeframe (default: 7 days).
- 2. Insurance Company Blocks:** Company can block that dealer from participating in their future auctions.
- 3. Dealer Pays Fine:** To be unblocked, the dealer must pay a fine through the PRS platform.
- 4. Access Restored:** Once the fine is confirmed, the dealer can bid on that company's vehicles again.

IN SIMPLE TERMS

"If a dealer wins a car but doesn't pay, the insurance company can block them from future auctions. The dealer has to pay a penalty fee through the website to get unblocked. This protects honest businesses from time-wasters."

Payment Timeline — Clear Expectations

RULE	DETAILS
Default Payment Window	Winners have 7 days to arrange and complete payment after winning a bid
Extended Timeline	Insurance companies can extend the deadline if the dealer provides a valid reason
Payment Method	Payment is arranged directly between dealer and insurance company — outside the platform
Platform Fee	Both the seller and the winning buyer pay a percentage fee to PRS for using the platform

Vehicle Information — What Gets Listed

When insurance companies or private sellers upload a vehicle, they can include comprehensive details to help dealers make informed bidding decisions:

FIELD	REQUIRED?	DESCRIPTION
Vehicle Photos	YES	Multiple photos showing damage, condition, and overall appearance of the vehicle
Make	YES	Vehicle manufacturer — e.g., Toyota, Honda, Suzuki, etc.
Model	YES	Specific vehicle model — e.g., Corolla, Civic, Swift, etc.
Variant	OPTIONAL	Specific variant or trim level — e.g., GLI, XLI, VTI, etc.
Registration Number	YES	Vehicle's official registration plate number
Company Value	OPTIONAL	Insurance company's estimated value of the vehicle
Comments	OPTIONAL	Additional information about vehicle condition, damage details, or special notes

International Access — Global Marketplace

PRS is designed to welcome users from anywhere in the world. This opens up the platform to a global market of salvage vehicle buyers and sellers.

- **Global Registration:** Anyone from any country can register as a dealer or private seller
- **Cross-Border Bidding:** International dealers can bid on vehicles listed by local insurance companies
- **Expanded Market:** Insurance companies get access to a larger pool of potential buyers
- **Diverse Opportunities:** Dealers can source vehicles from multiple countries and markets

PLATFORM RULES & POLICIES

PRS operates with clear rules to ensure fairness, transparency, and trust among all users.

Registration Policy

POLICY ACCEPTANCE REQUIRED

All users must accept the platform policy during registration. This policy clearly states that both the insurance company (seller) and the salvage buyer (winner) agree to pay a percentage fee to PRS for using the platform. This ensures everyone understands their obligations before any transactions take place.

Bidding Rules

#	RULE	EXPLANATION
1	Registered Users Only	Only registered and approved users can place bids on vehicles
2	Bids Are Binding	Winning bidders are expected to complete the purchase — this is a commitment
3	Highest Bid Wins	The highest bid at auction end wins the vehicle — no exceptions
4	Blocking Consequence	Dealers blocked by an insurance company cannot bid on that company's vehicles until unblocked
5	Fair Bidding	No bid manipulation or collusion — all bids must be genuine and competitive

Payment Rules

#	RULE	EXPLANATION
1	Payment Timeline	Winners must arrange payment within 7 days (or extended deadline granted by seller)
2	Direct Arrangement	Payment is arranged directly between buyer and seller — PRS facilitates the connection
3	Platform Fee	Both parties must pay their platform fee to PRS after successful transaction
4	Non-Payment Consequence	Failure to pay may result in blocking from that insurance company's future auctions
5	Good Faith	All transactions should be conducted in good faith with honest communication

Platform Fee Structure

How It Works: When a vehicle is sold through PRS, both the seller (insurance company or private seller) and the winning buyer pay a percentage fee to the platform. This fee is agreed upon during registration and is a small percentage of the final sale price. The fee covers platform maintenance, support, and continued development.

USER EXPERIENCE & DESIGN

PRS is designed to be professional, easy to use, and accessible to everyone — regardless of technical skill level.

Landing Page — First Impression

When visitors first come to the PRS website, they see a clean, professional page that immediately communicates what the platform does:

- **Platform Introduction:** Clear explanation of PRS and its purpose
- **Green & White Theme:** Professional, trustworthy color scheme
- **Clear Call-to-Action:** Prominent "Sign Up" and "Login" buttons
- **Role Selection:** Easy choice between Insurance Company, Salvage Dealer, or Private Seller
- **Trust Signals:** Platform statistics, testimonials, or key benefits highlighted

Navigation — Simple & Intuitive

FEATURE	HOW IT HELPS USERS
Back Button	Available on every page — users can always navigate back easily without getting lost
Side Menu	Company folders displayed on the side for quick access — no searching required
Clean Layout	Uncluttered design with green and white colors — easy on the eyes and professional
Mobile Friendly	Works on phones, tablets, and computers — access from anywhere, anytime
Consistent Design	Every page looks and works the same way — no surprises or confusion

Notifications — Stay Informed

Users receive timely notifications for all important events:

FOR DEALERS

- When a new vehicle is listed by an insurance company they follow, when they're outbid, and when they win an auction — with full vehicle details and seller information.

FOR INSURANCE COMPANIES

- When a new bid is placed on their vehicle, when an auction ends, and when payment arrangements are complete — with full bidder details and amounts.

FOR ALL USERS

- Important platform updates, policy changes, and announcements that affect their account or business operations.

What Makes PRS Different

DIFFERENTIATOR	WHY IT MATTERS
Industry-Specific	Built specifically for salvage vehicles — not a general auction site trying to do everything
Company Folders	Organized by insurance company — dealers build relationships with preferred partners
Flexible Auctions	Draft feature lets companies collect vehicles and create strategic auction events
Dealer Protection	Blocking system protects insurance companies from non-paying bidders
Global Reach	International access expands the buyer pool and creates more opportunities

PLATFORM VISION & SUMMARY

Where PRS Is Heading

PRS aims to become the leading platform for salvage vehicle auctions, starting with Pakistan and expanding internationally. The platform will grow to serve markets across South Asia, the Middle East, and beyond.

SHORT-TERM VISION (YEAR 1)

Establish PRS as the go-to platform for salvage vehicle auctions in Pakistan. Build a strong user base of insurance companies, salvage dealers, and private sellers. Create a trusted, efficient marketplace that all parties prefer over traditional methods.

MEDIUM-TERM VISION (YEAR 2-3)

Expand to neighboring markets including India, Bangladesh, Sri Lanka, and the Middle East. Add new features based on user feedback. Build partnerships with major insurance companies across the region. Establish PRS as the industry standard for salvage vehicle auctions.

LONG-TERM VISION (YEAR 4+)

Become the global platform for salvage vehicle trading. Integrate advanced features like AI-powered vehicle valuation, blockchain-based transaction verification, and international shipping coordination. Serve markets worldwide with localized versions for different regions.

Platform Summary

ASPECT	DETAILS
What It Is	An online auction platform dedicated to salvage vehicles — connecting sellers with buyers
Who Uses It	Insurance Companies, Salvage Dealers, Private Sellers, and Platform Administrator
How It Works	Sellers list vehicles → Dealers browse and bid → Highest bidder wins → Payment arranged directly
Key Innovation	Company folders, flexible auction timing, dealer blocking system, and international access
Design	Professional green and white theme — clean, modern, and trustworthy
Accessibility	Works on all devices — desktop, tablet, and mobile — accessible worldwide
Business Model	Percentage fee from both seller and buyer on successful transactions
Growth Path	Pakistan first → South Asia → Middle East → Global expansion

THE BOTTOM LINE

"PRS is a professional, organized online marketplace that makes buying and selling salvage vehicles easier, faster, and more transparent for everyone involved. Insurance companies get better recovery value, dealers get access to more inventory, and the entire industry benefits from a modern, efficient platform designed specifically for their needs."

Ready to Move Forward?

This document provides a complete overview of what PRS is, who it serves, how it works, and where it's heading. The next step is to discuss implementation details, timeline, and how we can bring this vision to life.

Next Steps: Review this document, ask any questions you have, and let's schedule a follow-up meeting to discuss the detailed implementation plan and how we can make PRS a reality in the Pakistani market and beyond.
